

# Master's Project

## Course Information

- Instructor: Jennifer Kim (jennifer.kim@cc.gatech.edu)
- Course Prefix and Number: CS 6999 K19
- CRN: 88652
- Term: Fall 2026

## Course Description

This course provides academic credit for a Master's Project conducted under the supervision of a faculty advisor.

The project involves independent work focusing on research, design, and implementation within the student's area of study.

## Course Learning Outcomes

- Conduct independent project work under faculty supervision
- Apply appropriate research or design methodologies
- Demonstrate critical thinking and problem-solving skills
- Communicate project outcomes effectively in written and oral formats

## Required Course Materials

No textbooks or materials are required. Resources are determined in consultation with the instructor.

## Grading Policy

This course is graded on a Satisfactory (S) / Unsatisfactory (U) basis.

S indicates acceptable progress toward project completion; U indicates insufficient progress.

## Attendance Policy

No scheduled class meetings. Students work independently and meet with the advisor as agreed.

## **Academic and Research Honesty**

Students must adhere to Georgia Tech's academic integrity policies and conduct work responsibly.
