General Course Information

Description

The aims of this seminar are to introduce the historical context and evolution of European integration and to examine the core institutions, political actors and policy-making processes of the European Union. The course will also consider the major challenges facing the EU today, especially the security and humanitarian crisis provoked by Russia's war against Ukraine, now a candidate country to the EU, but also the impact of the Trump Administration's trade policies and the energy crisis and economic fallout from the conflict in Iran. The course will also expose students to the institutional changes implemented with the Lisbon Treaty, new initiatives such as the banking and fiscal union, the proposed Defense Union and the EU's approach to the digital and green transitions. The rise of euroscepticism and the increasing significance of far-right parties in the European parliament will also be examined. Other topics addressed include the political and cultural dimensions of European unification and identity, the changing nature of sovereignty, citizenship and democracy and the meaning of these concepts beyond the nation-state.
