Advance Internet Comput

Course prefix: CS

Course number: 6675

Section: OSZ

CRN
88752

Instructor first name: Ling

Instructor last name: Liu

Semester: Fall

Academic year: 2026

Course description:

This course reviews concepts, techniques, and optimizations in advanced Internet systems and application development, combined with in-depth study of fundamental principles underlying Internet computing. The course will explore new challenges and research issues that are critical for developing Internet-scale computing systems and applications.

Academic honesty/integrity statement:

Students are expected to maintain the highest standards of academic integrity. All work submitted must be original and properly cited. Plagiarism, cheating, or any form of academic dishonesty will result in immediate consequences as outlined in the university's academic integrity policy.
