

Introduction to the History of Disease and Medicine

Last Updated: Mon, 07/28/2025

Course prefix: HTS

Course number: 2080

Section: A

CRN

91135

Instructor first name: Taylor Elizabeth

Instructor last name: Dysart

Semester: Fall

Academic year: 2025

Course description:

This course's goal is to introduce students to the major topics, themes, questions, and methods in the history of medicine, disease, and the body. We will examine how ideas about healing, suffering, care, health, and illness have changed across time and space. These questions will be explored from the perspectives of caregivers—physicians, nurses, family members, and community organizations—and patients. This course begins with an exploration of ancient Greek and Chinese medical theories and practices and ends with reflections about our modern healthcare landscape. We will explore the advent of major medical advancements, such as the germ theory of disease and the rise of antibiotics, as well as lesser-known episodes in the history of medicine. We will trace these events around the globe with a geographic emphasis on the Americas and Europe, as well as colonial territories and post-colonial regions.

Academic honesty/integrity statement:

Scholarship is an intellectual, ethical, and social endeavor. It can be a great joy to discuss and debate assignments, ideas, theories, and readings with your peers. For this class, I encourage you to reflect on course materials, workshop ideas, and proofread drafts with your peers outside of our scheduled class time. However, you also have a responsibility to properly and clearly cite any ideas, language, or theories that you did not generate. It is a form of plagiarism to misrepresent another scholar's work as your own without proper attribution, even if such misrepresentation is unintentional. See below for proper citation practices, including a reference for the Chicago Manual of Style.

Any instances of academic dishonesty will result in disciplinary action, which may include a required resubmission, a failing grade, or a report to the Office of the Dean of Students.

Violations include cheating, plagiarizing, or the inappropriate use of online software, including AI.

If you have any questions or you're in doubt, please ask me. It is our shared responsibility to foster an environment where you can debate, discuss, take risks, make mistakes, improve, learn, and grow.

For more information, please see Georgia Tech's Academic Honor Code and Student Code of Conduct.
