

Advance Internet Comput

Last Updated: Tue, 03/17/2026

Course prefix: CS

Course number: 6675

Section: A

CRN

57156

Instructor first name: Ling

Instructor last name: Liu

Semester: Summer

Course description:

This course will cover concepts, techniques, and optimizations in advanced Internet systems and application development, combined with in-depth study of fundamental principles underlying Internet computing. The course will also explore new challenges and research issues that are critical for developing Internet-scale computing systems and applications.

Credit not allowed for both CS 6675 and CS 4675.

Academic honesty/integrity statement:

Students are expected to maintain the highest standards of academic integrity. All work submitted must be original and properly cited. Plagiarism, cheating, or any form of academic dishonesty will result in immediate consequences as outlined in the university's academic integrity policy.
