

# Master's Project

---

Last Updated: Tue, 03/17/2026

**Course prefix:** CS

**Course number:** 6999

**Section:** H16

**CRN**

87683

**Instructor first name:** Seth

**Instructor last name:** Hutchinson

**Semester:** Fall

**Course description:** Final project for students completing a master's degree in the College of Computing. Repeatable for multi-semester projects.

**Academic honesty/integrity statement:**

Students are expected to maintain the highest standards of academic integrity. All work submitted must be original and properly cited. Plagiarism, cheating, or any form of academic dishonesty will result in immediate consequences as outlined in the university's academic integrity policy.

**Core IMPACTS statement(s) (if applicable):**

**This is a Core IMPACTS course that is part of the STEM area**

**Core IMPACTS** refers to the core curriculum, which provides students with essential knowledge in foundational academic areas. This course will help master course content, and support students' broad academic and career goals.

This course should direct students toward a broad Orienting Question:

- How do I ask scientific questions or use data, mathematics or technology to understand the universe?

Completion of this course should enable students to meet the following Learning Outcomes:

- Students will use the scientific method and laboratory procedures or mathematical and computational methods to analyze data, solve problems and explain natural phenomena.

Course content, activities and exercises in this course should help students develop the following Career-Ready Competencies:

- Inquiry and Analysis
- Problem-Solving
- Teamwork
